

Computer Network Laboratory ENCS4130

TODO 1: Subnetting

Name: Aya Dahbour

ID#: 1201738

Given the following the topology divide the given range 192.X.0.0/24 on the Networks A, B, C, D, and E using a minimum number of IPs. Note: **The router interfaces are already counted in each subnet host count.**

X: Last 2 digits of your ID#.

X= 38

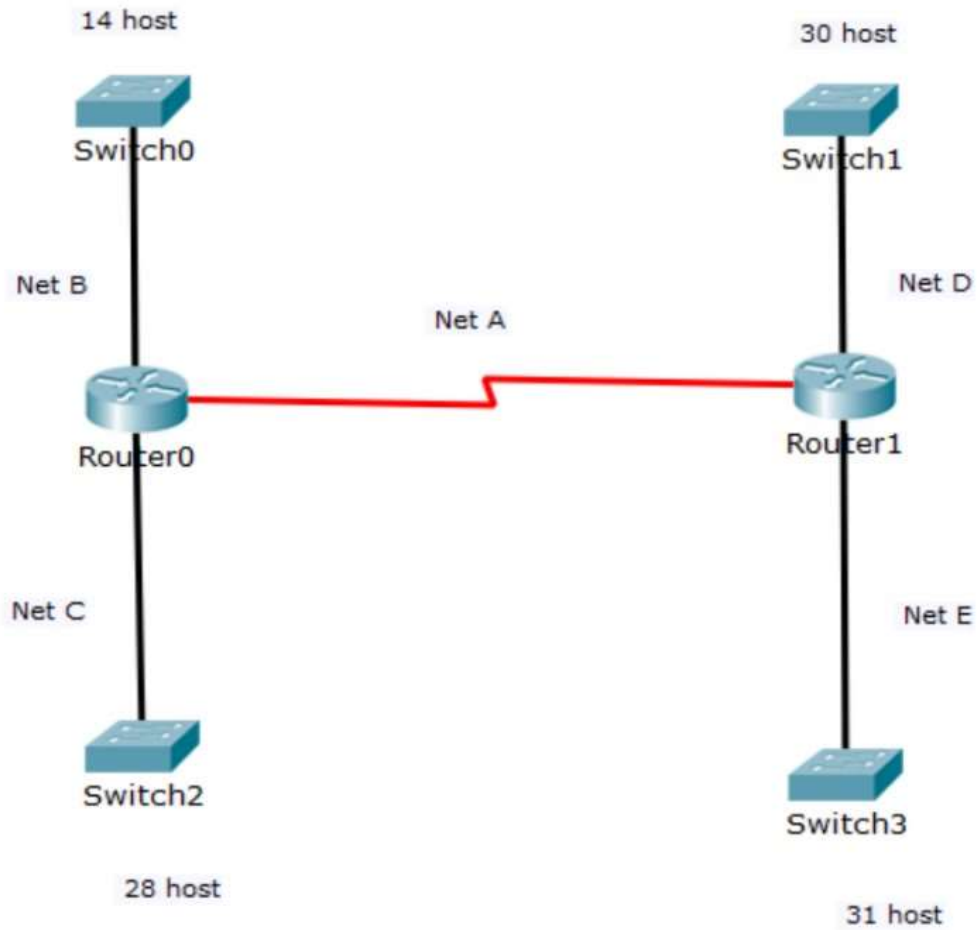

Figure 0-2 Network topology

Network symbol	Network ID	Broadcast	Subnet mask	Wild card
E	192.38.0.0/26	192.38.0.63	255.255.255.192	0.0.0.63
D	192.38.0.64/27	192.38.0.95	255.255.255.224	0.0.0.31
C	192.38.0.96/27	192.38.0.127	255.255.255.224	0.0.0.31
B	192.38.0.128/28	192.38.0.143	255.255.255.240	0.0.0.15
A	192.38.0.144/28	192.38.0.159	255.255.255.240	0.0.0.15
